Traditional Chinese Medicine (TCM)

Acupuncture and Herbal Medicine

TCM is an effective form of health care that has evolved into a complete and holistic medical system. Practitioners of acupuncture and Chinese medicine have used this non-invasive medical system to diagnose and help millions of people get well and stay healthy. An acupuncturist will place fine sterile needles at specific acupoints in the body. This activates the body's Qi and promotes natural healing by enhancing recuperative power, immunity, physical and emotional health. It also can improve overall function and well-being. It is a safe, painless and effective way to treat a wide variety of medical conditions. An acupuncturist will treat using one or more modalities under the scope of practice. Modalities include Acupressure, Tui Na, Cupping, Craniosacral Therapy, Electro-Acupuncture, Gua Sha, Herbal Medicine, Moxibustion, and Qi Gong.

Acupuncture is Recommended for:

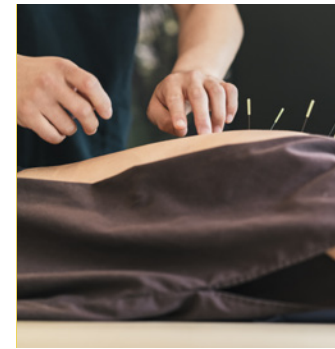

- Enhanced Immune Response
- Increased Joint Range of Motion

Specialties

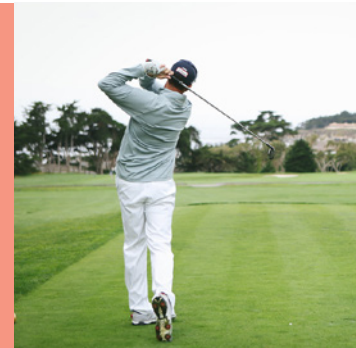

Pain Management

We provide effective treatments and care when you are in pain, injured or ill. More and more Americans—and their physicians—have been finding acupuncture to be a useful tool in treating back and neck pain, osteoarthritis pain, and headaches—including migraines.

Sports Acupuncture

We use modern acupuncture techniques to treat sports injuries and orthopedic disorders. Professional athletes utilize acupuncture to enhance their performance. Sports acupuncture is effective to decrease pain and inflammation thereby speeding up recovery and rehabilitation time.

Fertility

Acupuncture is a process-oriented method of medical intervention that increases blood flow to the endometrium as well as balances hormones. Fertility specialists recommend acupuncture along with IUI and IVF protocols.

Cosmetic Acupuncture

Our non-invasive cosmetic acupuncture protocol improves skin health and fights the aging process. Cosmetic acupuncture can help reduce wrinkles, diminish fine lines, remove age spots and lift droopy eyelids.
